Hello to all our visitors and customers.

We would like to thank you for your continued business, inquiries and feedback. It has been a very turbulent couple of years with COVID-19, supply chain issues and the war in Ukraine.

We have not had a price increase for over ten years but today's current economic environment has forced us to update our prices.

Effective March 01, 2022 some of our products have experienced a price increase. Any orders that were being discussed before this date will not be affected.

Some factors forcing this decision include, higher market costs of raw materials such as lacing, foam, leather, nylon and webbing. Other reasons are overseas wages, increased transportation costs, brokerage fees and other components.

We at Mitchell Enterprises have done our best to maintain our prices by absorbing costs, selling at costs and even taking a loss below our costs. As you may be aware, the prices of consumable goods and raw materials are increasing with every purchase that all of us are making on a regular basis - whether it's groceries, gas, building/manufacturing supplies; etc. When will it end is unknown and volatile world conditions are affecting our day to day lives.

We empathize with all of you during these challenging times and are giving you some insight as to what's going on. As well, we're still increasing the size of purchase orders with our suppliers to be proactive in maintain the prices of our raw materials to try to minimize the continued rising cost of materials.

Your valuable time and consideration are both greatly appreciated. Thank you, in advance.
